

Stockaide® | Yellow Jacket®

Dryland Pasture Mixture for Extremely Low Rainfall Areas

Extreme Drought Tolerant

Increase Grazing

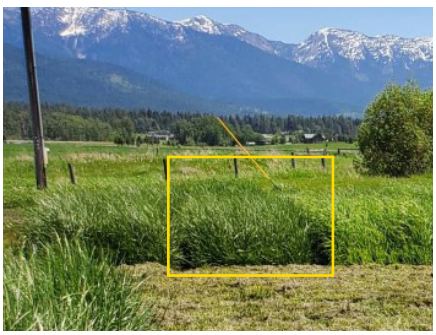

Engineered for Dryland

Key features

- Works well in extremely-low precipitation zones (7-12 inches)
- Features Hamann creeping wheatgrass

Maintenance

Seeding Rate:	25-30lbs/acre
Seeding Depth:	1/8" - 1/4"

Stockaide® powered by Yellow Jacket® is designed for new planting or inter-seeding into range and extreme dryland pastures in low rainfall areas and also works in areas that have limited irrigation such as spring runoff irrigation, which is common in many areas.

Stockaide® | Yellow Jacket® consists of the newly developed Hamann (creeping wheatgrass) and other premium varieties of Crested Wheatgrass, Siberian Wheatgrass, Russian wildrye, Wheatgrass. Exclusive to Barenburg USA, Hamann exhibits extreme drought tolerance and persistence.

Management Information

How & When to Plant:

Stockaide® | Yellow Jacket® can be planted utilizing the following methods:

- No-tilled into an existing pasture after vegetation is removed
- Fall dormant seeding or early spring planting
- Late summer/early fall planting is an option where fall moisture is available
- Stockaide® | Yellow Jacket® can also be planted into a firmly prepared seed bed or no-till

Grazing Management

Allow Stockaide® | Yellow Jacket® to establish to at least 10-12 inches tall. Once it has reached this height, introduce a light, initial grazing, leaving 4-5 inches of stubble. Leaving this stubble will encourage tillering. Once Stockaide® | Yellow Jacket® has re-covered, grazing can continue. This mixture is ideal for all types of grazing and is well suited for stockpiling as well.

Other Management Information

Stockaide® | Yellow Jacket® is a mixture that contains hardy varieties specifically selected for harsher environments.

Hamann at Montana State University in a private trial.
Receiving no irrigation beyond rainfall in a year with below average precipitation and snowfall, Hamann produced a substantial amount of biomass.
