

Wildfire™

Golf, Sports Fields, Parks, & Lawns

- A-LIST Certified
- US-Wide Top TQ
- Traffic Tolerance
- Blue Tag Certified

Key features

- Top performance country wide
- Excels under high and low maintenance
- Widespread Disease Resistance
- Traffic, Drought, and Shade Tolerant Tall Fescue Blend
- Greens up fast and retains color late

Maintenance:

Seeding Rate:	6-10lbs./M*
Mowing (Recommendation)	1.5-3.0”
Mowing (Down to)	1.0”

**M=1,000 square feet*

Barenbrug's Wildfire Tall fescue blend was created to combat the harsh environments we face today; giving turf managers and/or owners a tool to fight the dynamic stresses they face on an annual basis.

Wildfire embodies the mission of the Alliance for Low Input Sustainable Turf by benefiting the environment through requiring less water, fertilizer, chemicals, and pesticides. Varieties in the blend are disease resistant with high turf quality throughout the country, have good drought tolerance, and can take a beating better than most Tall fescues. Combining these traits with its good scores under lower mowing heights of 1.5" (3.8 cm), Wildfire has the potential to spread across the States as the envy of the block, a country club show stopper, and provide a safer, more sustainable alternative to synthetic turf fields.

Technical Information

Specifications

Wildfire has a wide-range of applications to golf, sports, and lawn & landscape regardless of major region in the cool season and transition zones. It has the ability to better resist diseases across the country, green up fast in the spring and stay greener into the fall and winter. Managers can take advantage of reduced inputs from fertilizers, to water, and pesticides as a low input turfgrass. Or, when under high maintenance scenarios, Wildfire can stretch existing resources even further, pushing quality to excellent levels for Tall fescue.

Disease Resistance

Uses data from 2018 and 2012 NTEP cycles. Highlighted top group performance for resistance to diseases, as well as performance above quality of 6 in the 1 to 9 NTEP rating scale.

#1 GROUP IN EVERY REGION OF THE US*
